JOB TITLE: SENIOR SOFTWARE ENGINEER/.NET DEVELOPER   **DEPARTMENT:** Information Technology

LOCATION: Long Beach, CA   **CONTACT:** Human Resources Dept

SENIOR SOFTWARE ENGINEER/.NET DEVELOPER

Position Summary: Metro, an equal opportunity employer, has an immediate need for a Sr. Software Engineer/.NET Developer focusing on Web services and .NET technology. Experienced leading teams in the development of .NET applications including software architecture, cloud infrastructure and data base architecture is required. The candidate will need to have a solid project management and business analyst background.

All applicants are expected to demonstrate a sample of their .NET and Web development work.

Key Responsibilities/Performance Requirements:

- Perform full application development life-cycle (from concept/analysis and design to post deployment activities) leading various life-cycle stages including requirements gathering; architecture/technical specifications & design; application configuration; database design; programming; quality assurance; testing and implementation; and ongoing maintenance and support
- Design, develop and maintain highly scalable applications for Windows Client, Smart Mobile devices (Windows, Android or IOS) as well as modern web applications and cloud services including RESTful services utilizing relational RDBMS (and NoSOL technologies)
- Collaborate with cross-functional team of developers, system administrators, service providers, third-party software technical staff, project managers, senior management and operations
- Extensive use of Web APIs, WCF and understanding of HTTP and REST architecture
- Experience with Agile software development (specifically Scrum)
- ETL-aware and in designing, building and supporting pipelines of data transformation, conversion and validation
- Provides expertise in architectural leadership in the areas of data governance, master data management, analytics, Data warehousing, scorecards, dashboards, business performance monitoring and data mining
- Consults and supports IT management in carrying out IT projects for assigned business units.

Qualifications/Skills Required:

- Minimum of 7+ years of experience in .NET solution-based implementations and web application development using Microsoft web stack and/or AWS. Proficiency with C#/VB, JavaScript/HTML, JQuery, ASP.Net (Web Forms and MVC), Web Services/Cloud Technologies such as Azure and AWS, Object-Oriented Analysis Methods and Unified Modeling Language (UML)
- Minimum of 5+ years experience in SQL Server 20XX including data modelling skills in addition to Analysis Services, Reporting Services and Integration Services. Proficiency in SQL Server development, query optimization, parameterized queries, T-SQL for developing complex stored procedures, and trigger management

- Minimum of 3+ years of experience in SharePoint development (and C# web development tools) including Powershell
- Microsoft Certified Solutions Developer (MCSD) or Microsoft Certified Solutions Associate (MCSA) or Microsoft Certified Database Administrator (MCDBA) or Microsoft Certified Solutions Expert (MCSE) certification
- Comprehensive understanding of AD/ADFS and IIS
- Excellent communication and interpersonal skills
- Computer Science – BS, MS, PHD or equivalent

Preferred Skills and Qualification:
- Experience in the following software or equivalent – Microsoft Dynamics GP, Dynamics CRM/Salesforce, Payroll/Paychex/Workday, Budgeting/Forecasting, Environmental/Health/Safety (EHS), Transportation/Logistics, and Equipment Inventory
- Early adoption with Visual Studio 2016, SQL Server 2016, .NET Framework 4.5, SharePoint Online, Office 365, Azure and Cloud Development
- Knowledge of the maritime and/or transportation industry, a plus
